

ECOTONE[®] ED FIELD SCOPES the definitive choice for serious birdwatchers. Designed to deliver outstanding optical quality and reliability. Manufactured to withstand severe conditions and to operate anywhere. Tested thoroughly in long-term Arctic and African research expeditions.

- Ultra-low-dispersion and high-resolution ED lenses
- Plasma coating on the outside surface of the eyepiece and objective lenses
- Newly designed coatings used: SHR on prisms and FFMC on all air-glass surfaces
- Bayonet-mounted eyepieces and photo adapters available
- Metal-reinforced and finished with rubber twist-up eyecup on zoom eyepiece
- Nitrogen-filled, completely waterproof, covered with natural rubber, durable body
- Slide-on hood, aiming line and rotating tripod mount
- 5-year warranty

Ecotone Field Scopes & Binoculars

ECOTONE® BINOCULARS

High resolution and perfect colour fidelity in a wide range of light conditions.

All models offer high standards of performance, design and quality.

- Aspheric, Long Eye Relief (LER) eyepiece lens design ensures eye relief with or without glasses and provides full field of view.
- Super High Reflection (SHR), Phase Corrected (PC) and multicoated BAK-4 prisms optimise image definition.
- Newly designed Fully Flat Multilayer Coating (FFMC) on all air-glass surfaces improves light transmission to more than 99%.
- The lightweight and durable magnesium or aluminium, nitrogen-filled, waterproof body is covered with natural rubber, which provides maximum protection and comfortable handling in all weather.
- All ECOTONE binoculars have full internal focusing. 2- or 3-stage locking twist-up eyecups are metal-reinforced and rubber finished.

New-generation binoculars, perfect brightness, high image resolution and edge-to-edge sharpness.

- Ultra-low-dispersion ED lenses
- Plasma coating on the outside surface of the eyepiece and objective lenses
- Phase-correction coating on prisms enhances resolution and contrast

MR-3 8x42 ED
